What stands out to me	Intergrates with Mailchimp, ConstantContact, Salesforce and more Very robust reporting capabilities Best suited for a large gallery	Has built in Online marketplace Several beautiful website templates to choose from Offers private customized viewing of curated works for clients Intergrates with Mailchimp, Stripe, Facebook & Instagram	They will work with you to integrate software into your existing website if you choose. Uses Amazon Web Services Cloud for hosting. Very secure	Database encryption and user access levels Website function is via Exhibit-e which offers many templates and digital marketing tools.	Offers templates, reporting, exhibition support such as wall cards and catalogue creation	Integrates with QuickBooks Accounting Software Good security features on user access levels and SSL certificates for data protection Best suited for a large gallery	Offers private customized viewing of curated works for clients Several beautiful website templates to choose from Back-end system is not very intuitive
